

EFT-Battery-1x

The battery module comes fully integrated with all relevant electronics (BMS, IMU, Fuses, Precharge Circuit, Contactors), which allows for a simple and safe integration into any vehicle.

Turn-Key	Includes all necessary components (BMS, IMD, Fuses, Precharge, Contactors)
Custom Shape	The battery pack can be fully adapted in shape to perfectly fit your application.
Modularity	Our modular design allows configuration with different voltages (40V-800V), power levels (up to 200kW) and energy content (1kWh - 200kWh)
Voltage	12S-192S (40V-800V)
Max continuous discharge	up to 10C
Max continuous charging	up to 2C
Operating Temperature Range	-20C to 60C
Battery Cell Format	21700
IP	IP 67 Enclosure
Cooling	Cooling Interface Plate on cell bottom

The EFT-Battery-1x is a modular, turn-key battery platform for advanced mobility applications (off-road, boats, motorcycle, utility vehicles).

The modular design of the battery furthermore allows to adapt all key parameters from shape, cooling, voltage, power and energy to perfectly fit for the clients application.
